

A county is flagged for elevated disease transmission if it meets two of the three criteria:

1. Average number of tests per day (per 100,000) < 100. The average number of molecular tests conducted in the most recent complete two week period in a county, divided by the number of people living in the county. This number is then multiplied by 100,000 to control for varying populations in counties. Due to reporting delay, this is reported over a 14-day period with a 7-day lag. Counties that average fewer than 100 tests per day will meet this criterion.

2. Case rate (per 100,000) > 200. The total number of cases diagnosed and reported over a 30-day period divided by the number of people living in the county. This number is then multiplied by 100,000 to control for varying populations in counties. Counties with a case rate greater than 200 per 100,000 will meet this criterion.

3. Case rate (per 100,000) > 50 AND testing positivity > 8.0%. The total number of positive molecular tests divided by the total number of molecular tests conducted. This number is then multiplied by 100 to get a percentage. Due to reporting delay (which may be different between positive and negative tests), this is reported over a 14-day period with a 7-day lag. Counties with a test positivity > 8.0% paired with case rate greater than 50 per 100,000 will meet this criterion.

County	Average Number of Tests per Day per 100k (14-day avg. with 7-day lag)	Case Rate per 100k (last 30 days)	Test Positivity (14-day with 7-day lag)
Carson City	320	974	11.4%
Churchill	306	1,588	18.1%
Clark	386	2,019	22.0%
Douglas	146	845	22.2%
Elko	136	800	19.5%
Esmeralda	117	924	37.5%
Eureka	124	458	20.6%
Humboldt	160	1,354	27.7%
Lander	311	1,084	10.3%
Lincoln	76	1,135	41.8%
Lyon	144	702	18.0%
Mineral	501	1,316	9.1%
Nye	146	743	22.0%
Pershing	624	7,742	26.2%
Storey	40	45	4.0%
Washoe	281	1,411	18.5%
White Pine	1,047	2,456	5.5%
